

TAOI® Pure Vibes is an orchid inspired personal massager designed for special moments, to relax and to enjoy our body and indulge ourselves.

But there is more to it. If we have a close look at the female anatomy, we will discover that using vibration stimulation in our external zone on the female genitals, we also do something good to our perineal musculature.

Why is using TAOI® Pure Vibes beneficial for our perineal muscles? The clitoris is an erectile organ located just below the edge of the pubic articulation. The perineal musculature is in direct or almost direct relation with the clitoris. See the connecting bulbocavernosus and ischiocavernosus muscles on the picture:

Thus, the perineal musculature and external genitals are connected by the pudendal nerve mostly. This nerve is at the same time a sensitive and motor nerve.

To conclude, TAOI® Pure Vibes Intimate Massager stimulates the clitoris and vulva by transporting information to the body through the nerves. The rotating vibrations of the massager work the sensibility of the pelvic zone, superficially as profoundly.

It's an easy and simple way to work the pelvic zone while at the same time we are enjoying our sexuality!
